

It is a sacred and honorable revolutionary duty for communists to conduct educational work well. This constitutes an important guarantee for the victory of the revolution and gives promise of a brilliant future for the prospering fatherland. We should develop socialist education to new heights on the basis of the successes already achieved in our educational work.

We should train all members of the new generation to be dependable builders of communism by educating them properly, and thus make them fine successors to our revolution. We should make a new turn in training our own cadres to meet the demands of the developing reality and train more able cadres actively serving the revolution and construction. We should establish the revolutionary habit of study across the nation and lead all members of society to work while studying and study while working to steadily raise their cultural and technical attainments.

The correctness of our Party's educational policy has already been proved clearly in practice. We will carry through the Theses on Socialist Education which embodies the Party's educational policy, and thus achieve greater successes in socialist education.
