

Party organizations must responsibly guide the organized and ideological life of students and direct great efforts to their political education and organizational tempering.

Party organizations must lead LSWY and JC organizations at school to perform their role satisfactorily. They should appoint good persons as LSWY and JC instructors at school and always educate them well. They also must see that LSWY organizations at all levels direct their main efforts to work with school children and student youth, and must intensify their guidance of school LSWY and JC organizations.

Party organizations must correctly direct the student enrollment of colleges and universities on Party and working-class principles. Institutions of higher learning must admit young people who have completed secondary education and have been tempered through work or in the army, are fully prepared ideologically to serve the Party and the revolution and are good at their studies.

In order to intensify the Party guidance of higher education, Party committees in colleges and universities must enhance their role.

Higher learning institutions have large bodies of teachers and student Party members, and departments and chairs and students have their own Party organizations. These institutions organize and carry out independently all kinds of work of educational administration beginning with the charting of education programs. Therefore, raising the role of their Party committees to properly guide all their work, is a major guarantee for success in the work of higher education.

The principal task facing university and college Party committees is to firmly establish the unified ideological system of the Party among the teachers and students and train all students to be able cadres, fine builders of communism, as required by the Party. These Party committees should responsibly organize and conduct the work of implementing the Party's educational policy and collectively discuss all important problems confronting universities and colleges, adopt proper measures and carry them out successfully. The Party committees must solidly build up their organizations and LSWY organizations in universities and colleges, raise their function and role and always control and guide the organized and ideological life of the teachers and students.

State Guarantee and Social Support for Educational Work

Enormous indeed are the material needs of socialist education which lets all members of society study. Also, socialist education needs modern conditions for education. Only when a state based on a strong independent socialist economy responsibly guarantees educational work, can the tremendous material needs of education be met and modern educational conditions provided.

The state must steadily increase investments in education and adequately provide all conditions needed for education.

The state must give precedence to the construction of school buildings in keeping with the increasing number of students and the requirements of the developing reality and build fine school laboratories and bases for practice. It must also amply provide textbooks, school things, various teaching tools and furnishings, and continue to improve and modernize them. It should build up the centers producing educational apparatuses and to supply them materials according to plans.

The state must build up good social educational establishments. It must construct many modern social educational establishments, including the students' and children's halls and the JC camps.

In socialist society all members of society must take part in educational work and the whole society must render active support to this work. In socialist society all working people should be educators of the young people and ensure educational work.

The working people, as parents of students, should always guide and help their sons and daughters in their studies and pay deep attention to the social education of all children and youth.

We should conduct a widespread campaign for social support to lay the material foundations of schools. All factories, enterprises and cooperative farms should become supporters' organizations to actively give material and manpower aid to the adjacent schools. Publishing houses, factories and enterprises must send new books, machines and equipment preferentially to schools, if they are needed for educational work.
