

THE SOLUTION TO BARBARISM

by
Joseph Mehrten

The world is looking for a solution to Communist barbarism but in the wrong places.

What makes this bestial enterprise go and grow? We know Communism has never been able to feed itself, that its economy is without incentive and always near collapse; yet, this empire keeps expanding. Why?

The answer is the key to wiping Communism from the map. The solution is so simple that many will justifiably wonder why it was not recognized years ago. Building *widespread* knowledge of the solution could make a capon of the Communist menace. For that purpose, we are putting a new force onto the battlefield — a force that each of us must help to build and make effective:

The Larry McDonald Crusade To STOP FINANCING COMMUNISM

This endeavor could have no more fitting name. Dr. McDonald was one of the most vigorous and respected pro-Americans ever to sit in Congress. Speaking on terrorism in 1976, Larry McDonald demonstrated his sincerity with these words:

Some Americans feel life will go on forever. Of course, it does not; every life terminates. George Patton on speaking to his troops had a good way of putting it, Since you are going to die someday, you might as well die a hero! I think that since all of us are simply spending time passing through this world, we would like to go out of this world with a belief that because we were here, it was a better place.
