

34,000,000 AMERICANS

C A N

Be Wrong !!

The word "FREE" is one of the best words in the American language. "FREE" speech; "FREE" press; "FREE" religion. They are American traditions

But SOMEBODY paid for these "free" things. The Pilgrims paid for them. Washington's men at Valley Forge paid for them; the soldiers at Gettysburg, the Marne, or the sailors at Pearl Harbor. All these people paid for our "free" things.

Then there are "free" things like free unemployment checks; "free" government pensions; "free" housing; "free" medical attention; "free" money to farmers

But SOMEBODY paid for these "free" things, too. Big corporations paid for them. Wealthy individuals paid for them. Sure. But the corner groceryman paid for them, too. The accountant, the gas station attendant, the turret lathe operator, the sheet metal worker. THEY paid for these "free" things. And YOU have paid for them, too.

Not just your personal income taxes; not just the excise taxes on cigarettes, gasoline or a wrist watch. You paid for these things and keep on paying for them every day, on everything you buy -- through hidden taxes. Even if you are one of the 34,000,000 people who got government checks of some sort this year. Even

YOU PAID.

We at BLANK MANUFACTURING COMPANY don't expect all those who received government money to give it up. In our 100 years of operation as a free competitive business we have long ago learned that people will only give up something if the fellow next door gives it up, too. No one can blame you. But remember what "free" things did to Britain and the dictatorships. If you continue to ask for free things America, too, will have socialism. See that our government doesn't become socialistic.
