\$15.00: A Christian Response to Dungeons and Dragons

One of the chief weapons used in the spiritual raid on our children is a game -- just a simple game. It is called *Dungeons & Dragons* and has sold millions of copies to youngsters all over America. In this revealing book, authors Peter Leithart and George Grant show just exactly what this phenomenal game is, how it works, and why it is so popular. They also provide a Biblical critique of the game so Christians can know how to respond.

\$25.00: Winning the Battle for the Minds of Men

Christianity once turned the world upside down. But today it is considered irrelevant. How did this happen? Why did the 20th-century Church retreat into what author Dennis Peacocke calls the "Christian Ghetto"? R. J. Rushdoony writes of this book: "If the readers are not aroused to action by it, it is because they are dead. It is an excellent book."

\$30.00: Power in the Blood

Not the plague of AIDS is here, what will the church do? There have been a number of books that have adequately analyzed the problem, but few if any have dealt with AIDS in biblical terms as David Chilton does in *Power in the Blood*. In the midst of what many experts believe to be the most savage disease in a millennium, God is speaking. God is speaking to a world that has winked at sin and is paying the price medically, judicially, socially, and economically. God is speaking to a Church that has tolerated disobedience by preaching a message of accommodation and tolerance. *Power in the Blood* is more than a book about AIDS. It's a book on how the world works and how the Church should work! It is not a book about surrender, but of confidence in a Sovereign Creator.

\$30.00: Aborted Women

Most of the dozens of books written on abortion since 1973 focus on abortion's effects on the unborn child. The women who abort their babies have often been ignored. In *Aborted Women*, David C. Reardon repairs this imbalance. Marshalling a wealth of statistical and anecdotal evidence, this powerful and disturbing book examines in minute detail the physical and psychological effects of abortion. Reardon also describes the outrageous special treatment accorded to the abortion industry. This book is essential to anyone who wants to understand the enormity of the crime of abortion.
