"CONGRESS SHALL MAKE NO LAW
RESPECTING
AN ESTABLISHMENT OF RELIGION. . . ."
-- First Amendment

Dear Friend,

You have another freedom -- the freedom FROM religion. That's why I'm writing you about an exciting new program by **American Atheists** called FUND FOR THE NINETIES. The fund is designed to support and expand the outreach we have on behalf of Atheism and state/church separation, to give us the needed resources to promote **American Atheists** more effectively, and to have a positive impact on our government at every level.

Many religious leaders are openly boasting that the decade of the 1990s will be "theirs." They talk of a widespread "spiritual revival," of waging "spiritual warfare," and "winning America for Jesus." We know all too well, however, what this means for our civil liberties. Basic freedoms are now threatened. With their efforts to ban abortion, censor books, plays, magazines, music, and other forms of communication, expand public funding for religious enterprise, teach creationism, even to bring back prayer-chanting in public schools, the religious activists have every intention of making "god's word" the law of our land.

But there is something you can do about this!

Since its founding in 1963 by Dr. Madalyn Murray O'Hair, **American Atheists** has emerged as the one organization consistently fighting on behalf of Atheist civil rights and the total, absolute separation of government and religion. With the American Atheist magazine, community-based American Atheist representatives, conventions, demonstrations, letter-writing campaigns, the "American Atheist Television Forum," lectures, and many, many other projects, our organization is now reaching record numbers of people. The weekly "TV Forum," for instance, is now on over 125 stations throughout the country. There are dozens of **American Atheist** representatives defending state/church separation at the local level. Each year, more books, pamphlets, and flyers are printed by the American Atheist Press.
