

INTRODUCTION

The time has come when all patriotic leaders must relinquish some of their petty jealousies, their self-styled leadership and take an inventory of their own short comings. Now is the time for all elected and self-appointed leaders in each State of the 48 States to get together and unit (if at all possible) and work out plans for unity and coordination by holding a State-wide convention whereby the people of that State can elect their leaders. Remember, this Country is a representative Republic, and furthermore, we are States' Righters, therefore, I would avoid looking for national guidance. This movement must be built from the ground up, not from the top down.

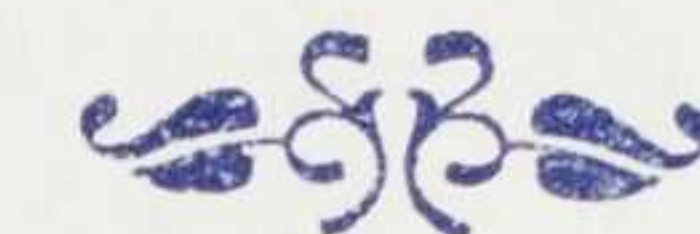

I am aware that you run the risk and the danger of the communists moving in and taking over but to prevent this action the conservative forces or factions in each State must unite and go into these conventions in such force that the communists will not have a chance to capture the convention. One of the reasons the communists have been able to infiltrate organizations is that we find so many prima donnas in the conservative ranks that stifle and retard political action. Everyone wants to be a general and give the orders and thereby split the conservatives into splinter groups. Each one of us feel that we are smarter and more capable of running an organization than anyone else. In some cases this is true and in those cases the conservatives will recognize those faculties and elect such leaders. We must have dynamic leadership—not milk toasts.

One of the best safeguards against communist capture is to elect your officers on a temporary basis at the first State-wide convention. We **must have a national unified party, a national name** and candidates on the ballot in each of the 48 States and there isn't a more tangible qualifying name than **The Constitution Party**.

The following 'Aims and Purposes' will start you on the road to victory and will liberate you in 1960 from the present socialistic trends in our nation today.

If you are dissatisfied with the present and previous administrations; if you believe in restoring our Federal Constitution and the Constitutions of the 48 States; if you are interested in your children and if you are concerned with the extravagance and waste of your tax dollar then go to work and organize the Constitution Party in your County and State.

The Constitution Party is now organized and functioning in many States but if you are unaware of its existence or leaders in your State, this office will gladly assist you.

AIMS and PURPOSES of THE CONSTITUTION PARTY of VIRGINIA

To enlist and encourage all Constitutionalists and States' Righters to engage in politics, schools, taxes, budgets and to repel and oppose all forms of government encroachment upon the rights of the people within the sovereign states.

A united and unified organization which will become the power factor in opposing the well organized forces of evil which are determined to circumvent the Federal and State Constitutions, to enslave every individual and create a totalitarian world government.

This organization will be broad enough in scope so individuals, large and small groups, including dissatisfied and disgusted Democrats and Republicans, will have an opportunity to affiliate and coordinate and exert their energy in restoring constitutional government and States' rights in this Republic.

It is not our intention to absorb or destroy existing organizations but we intend to provide a vehicle whereby all dedicated full time patriots can work together.
