tional living anatomy. Johns Hopkins University Press.

The Frog Book by Mary C. Dickerson is a classical non-technical biology study of frogs and toads. Dover.

Laboratory manuals

Modern Biology 1993, Laboratories, (ISBN #H94335-3) a lab workbook, addresses the issue of dissection and alternatives, and includes only one (optional) dissection procedure. Available in pupil and teacher editions. Holt, Rinehart and Winston.

W.H. Freeman publishes **Laboratory Separates**, a series on the anatomy and dissection of a rat, fetal pig, cat and others; and **Atlas and Dissection Guide for Comparative Anatomy** by Wischnitzer. Although we are opposed to dissection, these re-

prints from lab manuals may serve as a dissection alternative.
