

Why Accountability NOW!

Many Americans are deeply concerned about the direction our country is headed.

Our government system is not the problem, it's the people in it that are abusing their positions of power to force their will on America. This is why we are constantly forced to protect ourselves from more government control.

We need to remind our elected officials they are to "govern with the consent of the governed".

We can continue to go along to get along or we can choose to reclaim our future.

Now is the time to hold our elected officials accountable for their actions. If not now, when?

Our public officials are not protecting the rights of the people as guaranteed in the Constitution. To solve this, the people must speak out and remind public servants that in a Constitutional system "there are limits on the rightful power of government over citizens, officials govern according to law and citizens have basic rights which the government cannot take away or deny."

'We the People'

The American people have the power to hold our elected officials accountable for their actions. Accountability NOW! means we are going to start exercising this power to protect our nation and our freedoms by insisting that our officials:

STOP Doing things that significantly impact our lives without asking

STOP Giving in to special interests

STOP Eroding the principles of the Constitution

Accountability NOW! is the vehicle:

A nationwide, issue-driven campaign to create a powerful citizen's lobby

A watchdog group to ensure citizen interests are vigorously and continuously represented

Accountability NOW! will work to restore these core principles of our government.

"Liberty is the principle that individuals should be free to act and think as they choose, provided they do not infringe unreasonably on the freedom and well-being of others.

Self-government is the principle that the people are the ultimate source of governing authority and their general welfare is the only legitimate purpose of government.

Equality holds that all individuals have moral worth, are entitled to fair treatment under the law and should have equal opportunity for material gain and political influence.

Individualism is a commitment to personal initiative, self-sufficiency, and material accumulation. This principle upholds the superiority of a private-enterprise economic system and includes the idea of the individual as the foundation of society.

Unity is the principle that Americans are one people and form an indivisible union."

'We the People'

Accountability NOW! will apply these principles to the following issues where they have been blatantly abandoned. We will work in conjunction with others working toward similar objectives.

**Environment • National Security
Children, Education • Immigration**

The Environment

The environmental cause has been corrupted. It has become a political movement known as the Green Movement or Greens. The Sierra Club's 'Green Guide' lists the Greens/Green Party with 41 of the most powerful environmental groups. The goals of the Greens mirror socialism and communism. Lack of awareness of this alliance is at the root of America's inability to understand what is happening in our country and why it is happening. Caring Americans need to understand they are being manipulated.

The Green movement is comprised of minority special interest groups that are twisting the issues, violating the public trust and working behind the scenes to change America. Here is why we must take action now.

"The Biodiversity Treaty signed by President Clinton in 1993 gives the UN power to impose the Global Biodiversity Assessment. The document calls for:

- 50% of the US to be converted to wilderness, off limits to humans
- an additional 25% to be designated 'buffer zones', limited use
- Citizens to be relocated to sustainable communities

The design for this is presented in the President's Council on Sustainable Development Report, Sustainable America: A New Consensus."
