Dukakis on abortion

Hooray for Governor Dukakis for trying to help the poor women of Massachusetts on the abortion issue.

I am a poor working mother (still on partial weifare) trying to make ends meet. To have another child would destroy everything I'm striving for. I already have four children and that's plenty.

I want to become a police officer, but to become pregnant would ruin that dream. And to be forced to have another child (because I can't afford an abortion), I believe, is a violation of my Constitutional right.
