

For frankly, child pornography is a disease that kills the healthy and makes the sick stronger.

Children are lured away from their homes and sold.

Children are bribed with promises and wind up in morgues -- as suicides.

Children are destroyed in the big business of national child pornography.

Families are ruined and lives, young lives, are totally wasted. That is the terrible reality of child pornography.

My friend, I am outraged at what the faceless, nameless pornographers are doing to our children. And I hope you share my outrage. It's time to take action in defense of our children.

That's why your citizen co-sponsorship of H.R. 2106 is so important to Congressman Pashayan in his struggle to save America's children.

The time has come for every believer in morality and the American family to take a stand.

The time has come to say "NO" to militant, ruthless child pornographers.

The time has come to say "NO" to the liberals in Congress.

The time has come to say "NO" to the American Civil Liberties Union.

And the time has come to make your voice heard in Washington.

For now you and I are lucky: Congressman Pashayan and President Reagan share our vision of morality. But Congressman Pashayan and President Reagan can't abolish child pornography without you.

For the Ted Kennedy liberals in Congress and the American Civil Liberties Union stand in his way. But with your help, God willing, Congressman Pashayan and President Reagan will put an end to child pornography in America forever.

I have vowed that I will do everything in my power to help Congressman Pashayan and President Reagan in this noble crusade.

And I have commitments from the leading conservatives in the U.S. Senate and the U.S. House of Representatives to fight to the end.

Now a personal question: Do you care? And will you help?

I hope you just said "YES". For America and President Reagan need you to say "YES"!

"YES". It's a word that says you care.

It's a word that says you care about your children, your grandchildren and all the children in your neighborhood. Because you never know where the pornographers will strike.

You never know what innocent child will fall prey to the pornographers.
