

TREE OF LIFE

Introduction to the TREE OF LIFE, for many people, came when they were but a child. There was the Bible story about Adam and Eve and the Tree of Life. In that story, the Tree of Life was offered to the man and woman as a source of IMMORTALITY, but was quickly withdrawn from them after they had sinned against God. As the story goes the man and woman chose the TREE OF KNOWLEDGE of GOOD AND EVIL first, and that resulted in eventual death.

In the last chapter of Revelation in the Bible the TREE OF LIFE is offered to mankind, and the nations for their healing, after the New Jerusalem descends to the earth. What do these references to the Tree of Life really mean?

Kabbalists also speak of the Tree of Life, but in a much more detailed manner. They speak of the Tree of Life as the source of all creation as well as the source of Creative Intelligence that continues to sustain the world in balance and harmony. This view of the source of life and creativity is much superior to the viewpoint presently taught at our Schools and Universities.

The Tree of Life has two aspects to it; One of Light and the other of Darkness. Ever since the beginning of time there has been a battle between the forces of Light and the forces of Darkness upon the Earth. This battle is being waged for control of the minds of the human race to determine if ignorance and confusion will continue to flourish or if Enlightenment will finally emerge victorious. The tools of the forces of Darkness are error, deception, coercion, lying, cheating, stealing, shame and fear, to name a few.

The forces of Light, on the other hand, labor ceaselessly to re-establish a foundation of truth from which error and confusion will be swept away. The foundation of truth once illuminated the earth tens of thousands of years ago, and during the Aquarian New Age it will be established once again.
